CORMORANT II GALAPAGOS 5 DAY CRUISE

Small ship cruising in the Galapagos Islands offers a unique and immersive experience for travelers. Unlike larger cruise ships, small ships typically carry fewer passengers, providing a more intimate and personalized experience. This allows passengers to fully immerse themselves in the natural beauty of the islands, with the opportunity to explore remote locations and encounter wildlife up close. Additionally, smaller ships can access areas that larger vessels cannot, providing a more comprehensive and in-depth exploration of the Galapagos. Small ship cruising also provides a more sustainable and eco-friendly way to explore the Galapagos. The islands are a delicate ecosystem, and larger ships can have a negative impact on the environment. By choosing a small ship, travelers can enjoy the beauty of the islands without leaving a significant footprint.

ITINERARY

Day 1 Arrival to Baltra Airport and Transfer to the boat, Santa Cruz: Bachas Beach

Bachas Beach Located on the north shore of Santa Cruz, Las Bachas is a swimming beach. One of the few remnants of the U.S. World War II presence in the Galapagos, a floating pier, can be seen here. You may see flamingos, Sally Lightfoot crabs, hermit crabs, black necked stilts, and whimbrels. Sea turtles also nest off the beach.

Day 2 Genovesa: El Barranco, Genovesa: Darwin Bay

El Barranco Also known as Prince Phillip's Steps, El Barranco's steep, rocky paths leads up to a high cliff-face. A marvelous view can be appreciated from here. This site is also home to palo santo vegetation as well as red-footed

boobies, short-eared lava owls, Galapagos swallows, and Galapagos doves. Darwin Bay This white sand coral beach heads a half mile trail (0.75km) that winds through mangroves filled with land birds. Nazca boobies, red-footed boobies, and swallow-tailed gulls can be spotted here. Further down the path are tidal pools where sea lions swim playfully. At the end is a spectacular view off a cliff.

Day 3 South Plaza Island, Santa Fe Island

South Plaza Island In the morning, you will head to South Plaza Island. This small island with steep cliffs was formed by rising lava and is now covered by Opuntia cacti. It is also home to one of the largest sea lion colonies as well as colorful yellow and red land iguanas. The most characteristic plant is Sesuvium. During the rainy season its color is a greenish to yellowish tone and in the dry season (end of June through January) a bright red. Santa Fe Island Santa Fe (Barrington) is home to the small picturesque bay and anchorage on the island's northeast coast. The bay has two visitor trails, one leading to a scenic viewpoint atop a cliff, and the other spanning from a small beach to a tall prickly pear cactus forest.

Day 4 San Cristobal: Pitt Point, San Cristobal: Witch Hill

Pitt Point Pitt Point, situated on the northeastern tip of the island, hosts frigatebirds, storm petrels, and all three types of booby birds: the Nazca, blue-footed and red-footed boobies. A steep trail goes up a cliff and through a ravine leading visitors to an area with an abundance of birds. This site is also great for snorkeling and scuba diving. Witch Hill Located on the northern coast, this eroded hill and its surroundings present one of the most picturesque beaches in the Galapagos with its white powdery sand and the abundance of animals. Wildlife includes sea turtles, rays, and various types of booby birds. The clear water provides an excellent opportunity for enjoying swimming and snorkeling.

Day 5 San Cristobal: David Rodriguez Breeding Center, Transfer to San Cristobal Airport

"David Rodriguez" Breeding Center This is a new visitor site in the northeast part of San Cristobal Island and can now be reached in roughly one hour by road from Puerto Baquerizo Moreno. In the Breeding Center, you will be able to admire the hatchling turtles from their birth until they are 120 days old when

the grown turtles are taken to their natural habitat.
