

CORMORANT II GALAPAGOS 8 DAY CRUISE B

Small ship cruising in the Galapagos Islands offers a unique and immersive experience for travelers. Unlike larger cruise ships, small ships typically carry fewer passengers, providing a more intimate and personalized experience. This allows passengers to fully immerse themselves in the natural beauty of the islands, with the opportunity to explore remote locations and encounter wildlife up close. Additionally, smaller ships can access areas that larger vessels cannot, providing a more comprehensive and in-depth exploration of the Galapagos. Small ship cruising also provides a more sustainable and eco-friendly way to explore the Galapagos. The islands are a delicate ecosystem, and larger ships can have a negative impact on the environment. By choosing a small ship, travelers can enjoy the beauty of the islands without leaving a significant footprint.

ITINERARY

Day 1 Arrival to Baltra Airport and Transfer to the boat, Santa Cruz Island: Highlands / Tortoise Breeding Center

Santa Cruz Highlands Reached by bus from Puerto Ayora, the highlands of Santa Cruz are a deep green contrasting beautifully with much of the dry, lower islands. The dominant vegetation in the highlands is the forest of Scalesia trees creating the lush green color. The lava tubes, over half a mile long, are underground and walking through them is a unique, surreal experience.

Charles Darwin Station / Fausto Llerena Breeding Center The Charles Darwin Research Station is home to turtles ranging from 3-inches (new hatchlings) to 4-feet long. Subspecies of turtles interact with one another and many of the older turtles are accustomed to humans stretching out their heads for a photo opportunity. The babies are kept until they are about four years old and strong enough to survive on their own.

Day 2 Isabela: Tintoreras Islet / Sierra Negra Volcano, Isabela: Wetlands / Amaldo Tupiza Breeding Center

Tintoreras Islet The Tintoreras Islet, located a short distance from Puerto Villamil, is home to a great variety of wildlife. Its turquoise, crystalline waters are inhabited by white-tip reef sharks, Galapagos penguins, marine turtles and sea lions. One of its beaches surrounded by mangroves is one of the few sites where marine iguanas can reproduce successfully. **Sierra Negra Volcano** The Sierra Negra Volcano boasts the largest basaltic caldera in Galapagos at 9 x 10 km. The site offers impressive views and the opportunity to observe up to 7 species of finch and a rich display of vegetation. The north side of the caldera provides evidence of its most recent volcanic activity in 2005. **The Wetlands (Puerto Villamil)** The Wetlands of Isabela Island are located just outside of Puerto Villamil. The Wetlands consist of lagoons, swamps, and mangroves and are home to a variety of unique bird species such as common stilts, whimbrels, white-cheeked pintails, and gallinules. The Wetlands can be visited on foot via a path that winds through the swamps. **Tortoise Breeding Station (Puerto Villamil)** This center was created to protect animals in their first years of life from the threats of foreign species such as pigs and donkeys. Giant tortoise eggs are collected and brought to the center where they are hatched and kept for five years before being released to their natural environment.

Day 3 Isabela: Moreno Point, Isabela: Elizabeth Bay

Moreno Point Moreno Point is located near Elizabeth Bay on the west coast of Isabela Island. The plethora of birds seen during a dinghy ride along the striking rocky shores or a hike along path through lava rock leading to tide pools and mangroves create a birdwatcher's delight. In the tide pools, green sea turtles or white-tip sharks can be spotted. **Elizabeth Bay** Elizabeth Bay is located on the east coast of Isabela Island. The bay contains many islets which can be visited by dinghy. Penguins and blue-footed boobies can be spotted on the rocky islets. With an abundance of marine life and clear water, the area is perfect for snorkeling and viewing schools of colorful fish, sea lions, and perhaps even sharks.

Day 4 Fernandina: Espinosa Point, Isabela: Vicente Roca Point

Espinosa Point No foreign species have ever invaded Fernandina Island, and therefore it is one of the world's most pristine island ecosystems. The volcano "La Cumbre" dominates the landscape with lava fields reaching the ocean. The

island's highlight features the flightless cormorant nesting site. This area provides a great opportunity to see the Galapagos hawk. **Vicente Roca Point** Located on the northwestern coast of the island and comprised of two separate coves, this site is a large bay with spectacular sea life. Seahorses, sea turtles, and the strange yet fascinating Mola mola (sunfish) may be spotted here. This bay is great for diving and snorkeling.

Day 5 Santiago: Egas Port, Santiago: Espumilla Beach / Buccaneer Cove

Egas Port Also known as James Bay, Egas Port is home to the curious Galapagos hawks and quick-footed Galapagos lava lizards. The trail leads to a coastline with gorgeous tide pools and grottos full of fauna. Here the Galapagos fur sea lions bathe in the sun. This is also a great snorkeling site. **Espumilla Beach** Espumilla Beach is a popular place for marine iguanas and Sally Lightfoot crabs. The crabs attract the hunting herons performing the dance of predator and prey. With an abundance of marine life including octopi, moray eels, and sharks, snorkeling is highly recommended. **Buccaneer Cove** Buccaneer Cove is a testament to the fact that Santiago Island was once a refuge for British buccaneers. These pirates would anchor in the protected bay to make repairs and stock up on tortoise meat among other things. The steep cliffs, where hundreds of seabirds perch in front of the dark red sand beach, are a magnificent site.

Day 6 Bartholomew Island, Santiago: Sullivan Bay

Bartholomew Island Home of the famous Pinnacle Rock, Bartholomew consists of an extinct volcano with a variety of red, orange, black and even green volcanic formations. A trail of stairs leads to the summit of the volcano, boasting one of the best views of the islands. The beach is perfect for snorkeling and possible sightings of the Galapagos penguin. **Sullivan Bay** A coral beach landing leads you towards a lava field as far as the eye can see. Hunt and peck over the two distinguished types of lava, pahoe-hoe and 'a'a, for signs of plant life that have managed to emerge over the past 100 years since the most recent volcanic explosion. A truly amazing volcanic experience...up close and personal!

Day 7 Santiago: Chinese Hat, Santa Cruz: Dragon Hill

Chinese Hat Islet This small islet is located near the southeast coast of

Santiago Island. Its name comes from the distinct shape of the islet's summit. This small islet is a great location to view many geological formations such as lava tubes and lava flows. Dragon Hill (Cerro Dragon) Situated on Santa Cruz Island, Dragon Hill is one of the newest visitor sites accessible to tourists in the Galapagos Islands. One of the lengthier Galapagos walking trails will lead visitors along a beach and up a trail to the lagoon lookout where bright flamingos, pintail ducks, and land iguanas can be spotted.

Day 8 North Seymour Island, Transfer to Baltra Airport

North Seymour Island Galapagos sea lions, blue-footed boobies and magnificent frigatebirds are abundant on North Seymour Island. The island was formed by a series of submarine lava containing layers of sediment that were uplifted by tectonic activity. The island is characterized by its arid vegetation zone.

YOUR SHIP: CORMORANT II

YOUR SHIP:	Cormorant II
VESSEL TYPE:	Power Motor Catamaran
LENGTH:	148ft (45m)
PASSENGER CAPACITY:	16
BUILT/REFURBISHED:	2023

The Cormorant II is our brand new luxury mega-catamaran equipped with ample cabins and the most sophisticated design to provide the smoothest of sailing throughout the Galapagos seas.

The Cormorant II is the largest luxury catamaran in the Galapagos. Accommodating a total of 16 guests, this vessel features nine spacious, elegantly designed suites providing a pleasant and comfortable stay.

In each modern suite aboard the Cormorant II, guests will find floor-to-ceiling, panoramic windows and private balconies. The Premium Suites include an oversized balcony with an exclusive jacuzzi. The main deck features two pairs of connected cabins, which are the perfect option for families or groups.

An attentive crew will keep an eye on every detail, providing an intimate cruising experience through the Galapagos Islands during their 4, 5 or 8-day itineraries.
