## ESSENTIAL PATAGONIA: CHILEAN FJORDS & TORRES DEL PAINE

Retrace Charles Darwin's epic voyage to the 'edge of the world' on our Essential Patagonia: Chilean Fjords and Torres del Paine expedition, a comprehensive journey into Chile's spectacular network of fjords and channels. Helicopter flightseeing and Zodiac cruises along this enchanting stretch of coastline provide awe-inspiring perspectives of some of the most remote and picturesque landscapes on Earth. From Magellanic penguin colonies and other seabirds to South American sea lions and southern elephant seals, the fascinating array of wildlife is as abundant as the majestic blue-toned tidewater glaciers. Join us in this enchanting wonderland and experience all the natural splendors of southern Patagonia. By coming aboard for this special journey, you will also be among the first guests to experience our pioneering new vessel, Ultramarine. This purpose-built vessel is designed to extend the boundaries of exploration and offer an unmatched experience, including a flightseeing tour you'll never forget and a range of adventure options more extensive than any other ship in its class. We're excited to host you on your unforgettable adventure! Please feel free to reach out to our team of Polar Travel Advisers, who are happy to answer your questions and provide assistance at any time.

### ITINERARY

Day 1 Arrive in Buenos Aires, Argentina

You may arrive in Buenos Aires at any time during Day 1 of your itinerary. Upon arriving in this splendid city, known for its architecture and rich European

heritage, you will independently transfer to your group hotel (pre-expedition hotel night included in mandatory transfer package).

## Day 2 Fly to Ushuaia & Embark

After an early breakfast at the hotel, the group will transfer to the airport and board our private charter flight to Ushuaia, Argentina. Upon arrival, you will be transferred from the airport to a central downtown location to have some time on your own to explore this quaint port town before making your way to the pier. After a late afternoon embarkation, you will sail along the historic Beagle Channel, which transects the Tierra del Fuego archipelago in the extreme south of South America.

## Day 3 Cape Horn

As we begin our exploration of Chile's southern extent, expect a new adventure every day. Though each expedition will be different, depending on the weather, we aim to start our journey to the "edge of the earth" with a visit to historic Cape Horn (Cabo de Hornos). At the southernmost point of the Tierra del Fuego ("Land of Fire") archipelago, the most isolated place in the Americas, this steep, rocky headland on Hornos Island marks the northern boundary of the famous Drake Passage, where the Atlantic and Pacific Oceans meet. From the 1700s to the early 1900s, prior to the opening of the Panama Canal, this cape was part of a major global trade route. If sea and weather conditions allow, you may go ashore for a hike out to the lighthouse, the tiny Stella Maris ("Star of the Sea") Chapel, and the albatross-shaped monument honoring the many mariners who lost their lives attempting to "round the Horn." Atop the windswept promontory, pause for a moment to take in the panoramic view and to enjoy the peaceful solitude that can only be found at one of the most southern stretches of land in the world. You can even have your passport stamped by the family operating the lighthouse!

## Day 4 Diego Ramirez Islands

Your ship will then continue cruising farther south, to the Diego Ramirez Islands, the most southern point of South America and one of the least-explored places on the planet. This small archipelago was actually thought to be the southernmost land mass in the world when it was discovered in 1619 by the Spanish Garcia de Nodal expedition. Named after the expedition's cosmographer, the archipelago held this distinction for 156 years,

until Capt. James Cook's discovery of the South Sandwich Islands in 1775. Weather permitting, we'll Zodiac cruise around these tussock-grass-covered islands to admire the abundant birdlife. A designated Important Bird Area, and part of the recently-designated Diego Ramirez Islands and Drake Passage Marine Park, the archipelago is home to millions of breeding seabirds, and an exceptional place for birdwatching. Binoculars in hand, birders will marvel at the sight of multiple species of albatross (these islands are the southernmost albatross breeding ground in the world), including black-browed albatross, shy albatross and grey-headed albatross. Sightings of dolphins, South American fur seals, and rockhopper, macaroni and Magellanic penguins are also possible here.

## Day 5 Pia & Garibaldi Glaciers, Glacier Alley

As our ship sails back north toward the southern edge of Tierra del Fuego, stimulating presentations by your Expedition Team will enrich your knowledge of the glacial systems, geology, environment, wildlife and storied history of the region as you retrace Charles Darwin's historic journey through the Beagle Channel, a 150-mile (240 km) strait separating Tierra del Fuego's main island from several smaller islands. Named after Captain Robert FitzRoy's famous ship on which Charles Darwin was a passenger, the channel presents plenty of photo ops to capture seabirds hovering overhead and dramatic vistas of jagged-peaked mountains and massive tidewater glaciers. Rugged and untouched, this magnificent landscape is as starkly beautiful as it was when Darwin first laid eyes on it in 1833. Glacier Alley (as it's nicknamed) is one of the most spectacular ship passages in Tierra del Fuego. To honour the European countries that first explored the region, the glaciers have taken their names—España (Oblicuo), Romanche, Alemania (Roncagli), Francia, Italia, and Holland Glaciers. Situated within the protected boundary of Alberto de Agostini National Park, both Pia and Garibaldi Glaciers sit at the head of picturesque ice-choked fjords that offer jaw-dropping views. Located within the Cordillera Darwin (Darwin Mountain Range), the impressive Pia Glacier extends from the soaring mountaintops down into the sea. A short hike to a lookout point provides superb vistas of the glacier and mountains. Surrounded by pristine sub-Antarctic forests, Garibaldi Glacier flows from a separate mountain, providing equally exceptional views, with the Darwin Mountains rising dramatically out of the fjord. We can explore this area by Zodiac, including a beautiful glacial waterfall nearby. As we navigate the fjords, your Expedition Team will keep watch for Andean condors, massive birds rivaled in wingspan by only the wandering albatross.

## Day 6 Dainelli (Aguila) Glacier

**Wild Earth Travel**

*Small Ships, Big Adventures*

# Wild Earth Travel

*Small Ships, Big Adventures*

**wildearth-travel.com**

**info@wildearth-travel.com**

Located at the end of a tranquil lagoon surrounded by lush sub-Antarctic forests in Agostini Sound, Dainelli Glacier (sometimes called Aguila—Spanish for "Eagle" Glacier) is a unique sight, as it appears to flow over rolling hills rather than mountains. Cruising aboard a Zodiac toward the blue-tinged wall of ice, conditions permitting, you will be humbled by the wonder of nature's power. We hope to venture ashore for an easy hike along the beach to get a more intensive look at the glacier and surrounding mountains.

## Day 7 Cruising the Chilean Fjords

Continuing north, we'll navigate through a remote network of coastal fjords and channels, including time spent venturing out into the Pacific Ocean. Your Expedition Team will prepare for the adventures that await, helping you further understand the glacial systems, as well as the flora and fauna that can be found in this part of Chile. Take a moment, as we glide past soaring snow-capped peaks, to contemplate the mariners of long ago who traveled these same sheltered passageways, and were rewarded with the same wondrous sights.

## Days 8 and 9 Puerto Natales & Torres Del Paine National Park

Sailing the turquoise waters of the extraordinary stretch of coastline leading to the small port of Puerto Natales, we'll meander through a mesmerizing maze of deep, windswept fjords, narrow channels and isolated bays, with an eye toward the rugged landscape, unique wildlife and impressive glaciers that tumble from the towering mountains into the icy waters below, along with the imperial and king cormorants, South American terns, black-necked swans and southern wigeons (Chiloe wigeons) that frequent the fjord. Torres del Paine National Park is one of the most stunning wilderness areas in South America, and Puerto Natales is the gateway. This enormous park is a UNESCO Biosphere Reserve, so designated for both its natural wonders and ancient human history, and named for the three granite peaks that tower above the glacier-fed lakes. Enjoy a full day of hiking tailored to your preferred activity level and stopping at lookouts in the park, followed by a traditional Patagonian barbecue in the afternoon. Taking our expedition onto dry land for another full day, we will also visit a working Patagonian estancia ("ranch"), founded in 1891 by Scottish immigrants. Here you will learn about Patagonian sheep farming in a historic pastoral setting. Inhabiting the surrounding grasslands are the ostrich-like rhea, and guanacos, a wild relative of the domestic llama. Complete your cultural experience with a lunch of barbecued lamb al palo ("on

a stick"), and return to the ship in the early evening.

## Day 10 Canal de las Montañas

Cruising the calm, crystal-clear waters of the Canal de las Montañas ("Channel" or "Fjord of the Mountains") will leave you breathless. You'll be awed by the amazing series of waterfalls cascading down between the jagged peaks that rise up sharply on either side of the narrow, 41-mile (66 km) long channel dotted with glaciers, five of which spill dramatically into the water. Here, impressive ice fields glisten, and steeply sloped glaciers exceed elevations over 8,235 feet (2,510 meters). The channel also provides an ideal place to put our Zodiacs in the water for more detailed exploring or going ashore for a hike to scenic viewpoints. If you're feeling more adventurous, perhaps you'll treat yourself to an optional kayaking excursion (extra cost), an exceptional opportunity to experience the channel from a special perspective.

## Day 11 Tuckers Islets

A series of small islands and rocky outcrops in Almirantazgo Sound ("Admiralty Sound"), a small fjord off the Strait of Magellan, Tuckers Islets is a superb location for viewing penguins. Though landing here is prohibited, a Zodiac excursion will take you very near a pebble beach to view a colony of 4,000-plus breeding Magellanic penguins, conditions permitting. Named for Portuguese explorer Ferdinand Magellan, whose crew sighted the charming creatures in 1520 during the first circumnavigation of the globe, the species is native to the region, and the sight of them in their burrows, lounging on the beach or waddling in and out of the water, is one you won't forget. If we're fortunate, we may also see Chilean skuas, Magellanic cormorants (rock shags), imperial cormorants (king shags), oystercatchers, kelp geese, or even dolphins.

## Day 12 Ainsworth Bay & Islote Albatros

Continuing our exploration of Almirantazgo Sound, we plan to explore ashore at Ainsworth Bay, one of the most picturesque and pristine places in Patagonia. Surrounded by untouched sub-Antarctic forest, this isolated bay is a protected area within the border of Alberto de Agostini National Park. It hosts abundant birdlife, so you'll want to keep your eyes peeled as we cruise in the Zodiacs. Hiking options will be available for all fitness levels, affording panoramic views of Marinelli Glacier, Marinelli Fjord and the surrounding

# Wild Earth Travel

**info@wildearth-travel.com**

Darwin mountain range. In 2003, a small breeding colony of black-browed albatross was documented on Islote Albatros ("Albatross Islet"), located in Admiralty Sound. Normally albatross are seabirds, nesting and feeding in coastal waters and open ocean; this the first record of a colony of this species in inland waters, feeding mainly in fjords and channels.

## Day 13 Bahia Brookes

Another excellent spot for glacier exploring in Almirantazgo Sound is Bahia Brookes (Brookes Bay), where, conditions permitting, we'll go ashore by Zodiac. The bay offers ample chances for closer views of a number of waterfalls and glaciers, including the calving North Brookes Glacier, set against the breathtaking backdrop of the towering Darwin mountain range. Amid the serene silence of this icy wonderland, the only sound you may hear is the powerful roar of ice breaking off and crashing into the frigid waters below. This is also a great location for viewing ice fall deposits, which form reconstituted glaciers, and kame (silt and sediment deposits).

## Day 14 Marta Island

In the middle of the Strait of Magellan, Marta Island (Isla Marta) is home to abundant birdlife and more than one thousand Patagonian (South American) sea lions. To protect the wildlife, shore landings are not possible here, but we do plan to circumnavigate the island, providing numerous opportunities to observe and photograph the colony from a short distance, in the comfort of a Zodiac. Called lobos marinos ("sea wolves") by local Chileans, these giant pinnipeds--males can weigh over 700 pounds/320 kg--form quite a noisy group as each sea lion vies for a choice spot of coastline. As you cruise by, sightings of imperial cormorants, skuas, southern gulls, Antarctic pigeons--and if we're lucky, dolphins--are also possible.

## Day 15 Disembark in Punta Arenas & Fly to Santiago, Chile.

After an adventurous two weeks of exploration, you'll say goodbye to your Expedition Team and disembark in Punta Arenas, to be transferred to the airport for your charter flight to Santiago, where you are welcome to continue on your own travels or connect to your homeward flights.

Please Note:

Embracing the unexpected is part of the legacy - and excitement - of expedition travel. There are no guarantees that we can achieve everything we set out to accomplish. A measure of flexibility is something all of us must bring to a voyage.

## YOUR SHIP: ULTRAMARINE

<b>YOUR SHIP:</b>	<b>Ultramarine</b>
<b>VESSEL TYPE:</b>	<b>Expedition Ship</b>
<b>LENGTH:</b>	<b>128 metres</b>
<b>PASSENGER CAPACITY:</b>	<b>199</b>
<b>BUILT/REFURBISHED:</b>	<b>2019-2020</b>

Ultramarine is designed to go beyond the familiar in polar exploration, to discover new places, and to immerse you in the best the region has to offer.

Equipped with two twin-engine helicopters, Ultramarine offers the most robust portfolio of adventure activities in the industry, the most spacious suites in its category, breathtaking public spaces, and more outdoor wildlife viewing spaces than other expedition ships its size. It also features an innovative mix of sustainability features that exceed all industry standards.

With all this and more, Ultramarine is set to deliver the ultimate polar expedition experience.

Cabin - Spacious Entryways, Personal Safes, Spa-inspired Bathrooms, Heated Bathroom Floors, Premium beds and bed linens, Convertible Beds, Individual Temperature Controls, HD Flatscreen Televisions, Oversized Windows With Sweeping Views, Electrical Supply: 220V

Aboard - 2 Dining Areas, 4 Bars, Panorama Lounge, Lecture Theater, Library, Polar Boutique, Spa & Fitness Center, Oceanview Sauna, Zodiac Hangar with 4 Embarkation Points, 2 Ready Rooms with Individual Lockers, Walkaround Deck, Bridge Activities - Flightseeing (Included), Zodiac Cruising (Included),

Hiking (Included), Lectures (Included), Camping (Optional), Sea Kayaking (Optional), Stand-Up Paddleboarding (Optional), Paddle Excursions (Optional), Cross Country Skiing (Optional), Mountaineering (Optional)

(Optional)

## SPECIAL OFFERS

Special offers and discounts are available. Online prices do not reflect the discounted rates. Terms and conditions apply. Please contact us for more details.

### Optional extras & upgrades

#### Stand-up Paddleboarding

Stand-up Paddleboarding, popularly known as SUPing, originated in Hawaii. Quark Expeditions is the first company to bring this watersport all the way to Antarctica.

#### Exclusive Heli-Landing (Patagonia)

Imagine setting foot in an area of Patagonia that can only be safely accessed by helicopter. With a small group of fellow passengers and expert guides, you'll board one of Ultramarine's two twin-engine helicopters to soar off to an exclusive site where no ships can navigate. Expect stunning bird's-eye views during your flight, and then, upon arrival, simply sit back, relax and take in the splendor of Patagonia from "the best seat in the house": alpine amphitheaters, breath-taking summits, and more. Traveling in groups of 12 with no more than 4 groups (48 guests) at a time on each landing, you'll have time to relax and quietly reflect on the beauty of your surroundings, after which you'll be picked up by the helicopters in the same location and returned to Ultramarine.

#### Sea Kayaking

Positioning yourself in the seat of a kayak is one of the most intimate ways travelers can connect with the polar regions—at water level, up close, where you can touch and feel every polar sensation imaginable. The Sea Kayak Program enables a small group of like-minded individuals to forge bonds as they explore fjords, glacial faces or mazes of sea ice.

#### Paddling Excursion

Every sweep of the paddle as your craft glides through the pristine polar waters creates an incredible soundtrack: the jostle of glacial ice, the lapping of waves against the rocky shore, the perpetual drip from your paddle, the call of seabirds, and the occasional splash as wildlife break the surface of the water.
