## GALAPAGOS HORIZON 4 DAY CRUISE

When is the best time to visit Galapagos? Galapagos is a place that can be visited at any time. There are two seasons, and the warmest is between December and May. It is the time of year when the sky is always clear, and the sun shines strongly. If you love to dive in amazing places, the best time to visit Galapagos is from June to November. During this season the weather is a little cooler, but it gives you the chance to enjoy the best from Galapagos' famous marine reserve. Good weather for visiting all year round. Galapagos is on the Equator, but the weather is not tropical. Temperatures range from 69°-84°F / 21°-30°C Very little rainfall. Warm season Dec-May. Dry season Jun-Nov.

### ITINERARY

**Day 1** Arrival to San Cristobal Airport and Transfer to the boat, San Cristobal: Interpretation Center

Gianni Arismendy Interpretation Center The Gianni Arismendy Interpretation Center was opened in 1998 as a phase of the project "Interpretation and Environment Education Project." Visitors enjoy expositions on natural history, human history, and conservation. The conservation efforts represent the movement to protect the wildlife and natural environment through means of population and tourist control. The Gianni Arismendy Interpretation Center has an outdoor stadium, audio-visual equipment, and meeting rooms.

**Day 2** San Cristobal: Pitt Point, San Cristobal: Witch Hill / Kicker Rock

Pitt Point Pitt Point, situated on the northeastern tip of the island, hosts frigatebirds, storm petrels, and all three types of booby birds: the Nazca, blue-footed and red-footed boobies. A steep trail goes up a cliff and through a ravine leading visitors to an area with an abundance of birds. This site is also great for snorkeling and scuba diving. Witch Hill Located on the northern coast, this eroded hill and its surroundings present one of the most picturesque beaches in the Galapagos with its white powdery sand and the abundance of animals. Wildlife includes sea turtles, rays, and various types of booby birds. The clear water provides an excellent opportunity for enjoying swimming and snorkeling. Kicker Rock This striking rock formation is located a couple hours off the western shore of San Cristobal. Jutting out of the water, the rocks stand vertically at hundreds of feet above the ocean divided by a small channel. Although there are no landing areas, circumnavigation and dinghy rides allow visitors to spot a variety of marine life.

## Day 3 Española: Suarez Point, Española: Gardner Bay / Gardner Islet

Suarez Point This area is great for spotting blue-footed boobies, albatrosses and Nazca boobies. A beautiful site on the ocean front, the large waved albatrosses use the cliff as a launching pad. The famous attraction is the magnificent blowhole, spurting water high into the air. This site presents wonderful photograph opportunities. Gardner Bay Gardner Bay, on the eastern side of the island, is the breeding site of nearly all of the world's 12,000 pairs of waved albatrosses. It has an ample white sandy beach with a myriad of sea lions, perfect for relaxing. Its rocky shores make this site a great place for diving and snorkeling.

## Day 4 Santa Cruz: Bachas Beach, Transfer to Baltra Airport

Bachas Beach Located on the north shore of Santa Cruz, Las Bachas is a swimming beach. One of the few remnants of the U.S. World War II presence in the Galapagos, a floating pier, can be seen here. You may see flamingos, Sally Lightfoot crabs, hermit crabs, black necked stilts, and whimbrels. Sea turtles also nest off the beach.
