blue-footed boobies. The island's coastline also allows one to observe sea lions and marine iguanas basking in the sun. The large frigate bird colonies are a sight, especially when the males inflate their bright red throat pouches to attract mates.

## Day 2 – AM: SANTA FE & PM: PLAZAS

Lead in the day with the stark beauty of Santa Fe, where the towering figures of giant Prickly-pear cacti strikingly contrast the rugged landscape of lava rocks. Tucked within one of the Galapagos most breathtaking bays, Santa Fe's turquoise waters, and white-sand beaches form an inviting residence for a sizable colony of sea lions you'll find lounging about. As you venture inland, remember to look down to spot the endemic Santa Fe land iguanas, but also glance upward to catch sight of the Galapagos hawks perched atop cacti, keeping a keen eye out for prey. You'll likely encounter Darwin finches, Galapagos doves, mockingbirds, and lively lava lizards along the trail.

Your afternoon destination is South Plazas, one of a twin pair of islands where the northern sibling is reserved exclusively for scientific research. Though petite in size, this islet brims with a fantastic array of wildlife. Upon landing, Galapagos land iguanas will welcome you from beneath prickly-pear cacti, eagerly awaiting their fruit. Sea lions populate the island in large numbers, allowing you to observe their fascinating social dynamics, from playful pups splashing in tide pools to formidable males protecting their territories. Your trail eventually leads you to a cliff, a vantage point to observe a myriad of seabirds, including frigatebirds, red-billed tropicbirds, boobies, swallow-tailed gulls, and pelicans. A verdant carpet of reddish succulent vegetation dotted with scattered cacti blankets the island, giving South Plazas a genuinely unique personality.

## Day 3 – AM: BARRANCO & PM: DARWIN BAY

Located in the southern part of Darwin Bay on Genovesa Island, El Barranco is a wildlife sanctuary. Its fragile lava cliffs provide shelter for storm petrels and a remarkable population of short-eared owls. Along the trail, red-footed and Nazca boobies nest on the volcanic rock. At the base of the cliffs, Galapagos fur seals rest in shaded areas, while seabirds soar above this breathtaking landscape, making El Barranco an unforgettable destination for nature lovers.

Darwin Bay on Genovesa Island is a breathtaking sight for birdwatchers. As you step onto the beach, you'll be amazed by the presence of hundreds of boobies, gulls, and frigatebirds soaring, nesting in bushes, or resting on the

sand. Along the shore, sea lions and marine iguanas blend into the scenery, while inland you may spot night herons, swallow-tailed gulls, Darwin finches, Galapagos doves, and mockingbirds. This immersive experience brings you face-to-face with a thriving ecosystem.

## Day 4 – AM: HIGHLANDS & PM: BACHAS BEACH

Your day begins with a journey to the highlands of San Cristobal Island, offering a different perspective of the Galapagos' unique ecosystem. This lush and verdant area contrasts sharply with the coastal zones. The highlands are home to a variety of bird species, giant tortoises in their natural habitat, and a rich array of plant life, including endemic trees and ferns. You'll have the opportunity to walk along paths that meander through this lush landscape, offering a chance to observe the giant tortoises up close and personal. The highlands also provide panoramic views of the island, showcasing its diverse topography.

End your Galapagos adventure at Bachas Beach, a key sea turtle nesting site from November to May. At low tide, remnants of WWII barges emerge from the white sand. Explore its saltwater lagoons, home to flamingos, herons, and aquatic birds. After this final stop, transfer to the airport for your flight back to the mainland, concluding an unforgettable journey.

## Day 5 – AM: KICKER ROCK & PM: SAN CRISTOBAL AIRPORT (RETURN)

In the afternoon, embark on an unforgettable panga (dinghy) ride around Kicker Rock, also known as Leon Dormido, off the coast of San Cristobal Island. This impressive rock formation, rising dramatically 500 feet above the ocean, is one of the most iconic landmarks in the Galapagos. The natural erosion of this ancient volcanic tuff cone has created a channel between two towering rock walls, providing a haven for various marine life. This peaceful and scenic panga ride around Kicker Rock provides a relaxing yet awe-inspiring conclusion to your day, allowing you to appreciate the natural wonders and rich biodiversity of the Galapagos from the sea.

After exploring the breathtaking biodiversity and unique landscapes of the Galapagos, it's time to return to mainland Ecuador. You'll be transferred to the airport, bringing this unforgettable journey to a close. Every encounter with giant tortoises, blue-footed boobies, and volcanic landscapes will remain etched in your memory. Galapagos is not just a destination--it's a
