

ICELAND TO GREENLAND: TOTAL SOLAR ECLIPSE, 17 DAY EXPEDITION CRUISE

Opportunities to witness a total solar eclipse are rare. Your chances of experiencing one in the Arctic—from the deck of a polar ship—are even more rare considering the last total solar eclipse north of the Arctic Circle occurred in 2015. The next will take place on August 12, 2026.

To satisfy the demand of eclipse-watchers, we're offering two eclipse themed itineraries in 2026: Iceland to Greenland: Total Solar Eclipse, 13 days, on the helicopter-equipped Ultramarine; and Iceland to Greenland: Total Solar Eclipse, 17 Days, on one of our newest ships, Ocean Explorer.

This longer voyage—2,200 nautical miles in total—features your bucket-list eclipse adventure, time to explore Northeast and South Greenland, plus you get to check off two of the world's northernmost capital cities: the Icelandic capital of Reykjavik (64°08' north), where you'll have time to explore, and Nuuk, Greenland (64°11' north), where we disembark for our charter flight back to Reykjavik.

World-renown eclipse-cartographer Michael Zeiler (see page 6) will be onboard to deepen your understanding of eclipse-viewing, observational astronomy and celestial mechanics. Of course, you'll also get to witness waterfalls, towering cliffs and remote fishing villages in the Westfjords, a hidden gem of Iceland, as well as icebergs, wilderness areas, glaciers, and the deep fjords of Greenland.

Greenland.

ITINERARY

Day 1 - Arrive in Reykjavik, Iceland

Arrive in Reykjavik and transfer independently to your hotel, which is included

in the Charter Flight & Hotel Package. Depending on your arrival time, you may wish to explore sites of the fascinating capital, which is known for its mix of modern architecture and Viking heritage. At 64°08' north, Reykjavik is the world's northernmost capital of an independent sovereign state.

Days 2 to 4 - Embark in Reykjavik and Explore the Westfjords

After breakfast on Day 2, you'll have time to explore on your own before your afternoon transfer to the modern, purpose-built ship Ocean Explorer. We set sail for "Iceland's best-kept secret"--the Westfjords. This rugged peninsula, on the remote northwestern tip of Iceland, is dominated by mountains, volcanic rock and fjords. Mountains slope down to the sea in a dramatic fashion, providing plenty of opportunities for incredible landscape photography. We'll spend the day exploring by Zodiac and ship, as well as guided shore landings where possible. The views are diverse: dramatic cliffs, gushing waterfalls, colorful beaches, rolling green hills, high moorlands dotted with rocky outcrops and tiny lakes. You'll likely spot Icelandic ponies and shaggy sheep grazing the hillsides. A few outposts of civilization include small fishing communities at the fjord edges and along the shores of the Denmark Strait. One of the highlights in the Westfjords is a chance to visit Vigur, a private island where guests can delve into Icelandic culture and heritage as far back as the 11th century. Vigur is widely regarded as a capsule of Icelandic heritage. Upon arriving on shore by Zodiac. One of the island's co-owners is polar explorer Felicity Aston, the first woman to ski solo across Antarctica. You'll learn about the Icelandic tradition of eiderdown harvesting, and the wide array of Arctic birdlife and seals that are found in Vigur. It's estimated that Vigur Island is home to over 7,000 breeding ducks, 100,000 puffins, Europe's largest colony of Black Guillemots, and huge flocks of Arctic terns. You'll also have opportunities to ramble about the island, taste local food and visit the island cafe. Today's adventure options include Zodiac cruising, sea kayaking, paddle excursion program, and, potentially, a guided shore hike. Right across the bay is Mongufoss, one of Iceland's most remote and beautiful waterfalls, which we'll visit by ship. We may also visit Flatey, a small 1.5 km-long island in Breiðafjörður Bay.

Day 5 - At Sea: Crossing the Denmark Strait

As we sail north across the Denmark Strait between Iceland and Greenland, the Expedition Team will prepare you for the exciting adventures ahead--both on and off-ship. Our team of polar experts will present on a wide range of topics, including Arctic history, wildlife, geology, and climatology. The team will also search for and identify seabirds soaring about the ship--and they'll most

certainly alert you whenever there's a whale sighting.

Days 6 and 7 - Northeast Greenland: Exploring Kong Oscar Fjord

Navigating within the boundaries of the Northeast Greenland National Park--the planet's largest national park covering 972,000 square kilometers--we will sail into Kangerluk Kong Oscar, also known as Kong Oscar Fjord, on the northern border of Scoresby Land. This major fjord system, popular for its famously bright sandstone, stretches 110 kilometers long and 10 to 25 kilometers wide. You will also experience the wonders of nature in Segelsallskapet Fjord, where a spectacular display of "geological art" awaits: alternating layers of limestone and dolomite stretching before you in a stunningly beautiful canvas created over tens of thousands of years.

Days 8 and 9 - Exploring the Depths of Scoresby Sund

Our purpose-built vessel will cruise deep into Scoresby Sund, allowing guests to marvel at the overwhelming beauty of the world's largest fjord system and its vast icebergs. This area offers plenty of opportunities to explore during Zodiac cruises and onshore visits, and, if conditions allow, time to visit Iltoqqortoormiit, the most remote community in East Greenland. There will be a palpable sense of excitement in the air as anticipation builds for our much-awaited eclipse viewing. Behind the scenes, your Expedition Leader and the Ship Captain will work closely together, monitoring sea and ice conditions and meteorological forecasts--particularly cloud cover--to strategically position Ocean Explorer in the best location possible to maximize your views of the solar eclipse.

Day 10 - Solar Eclipse Viewing: In the Path of Totality

Ocean Explorer will sail further into Scoresby Sund, where the team will identify the most optimal viewing point along the path of totality. With the total eclipse of the sun lasting 2 minutes and 17.2 seconds, this region of the Arctic provides the longest duration of totality along the entire eclipse path. The eclipse will start at 2:34 pm, and totality will begin at 3:34 pm and end at 3:36 pm. The eclipse viewing experience, a duration of 2 hours, 1 minute, and 3 seconds, will conclude at 4:35 pm. Throughout this exciting day, you will have opportunities to learn from our guest eclipse expert, Michael Zeiler. This 2026 eclipse is part of Saros series 126, which is a cycle of solar eclipses that repeats approximately every 18 years. It's worth noting that total solar eclipses

wildearth-travel.com

info@wildearth-travel.com

in Polar Regions are relatively rare due to the smaller land area and the fact that the sun only illuminates each pole for part of the year. The Quark Expeditions team and our special eclipse expert will continue to research the geography of this region as we prepare for the event. Right up until the day of the eclipse itself, our team will study the mountainous terrain, the angles of the sun in the sky, localized ice conditions and weather patterns to determine the best possible viewing experience. Your Expedition Leader will outline the day's agenda in the days and hours leading up to the eclipse.

Days 11 to 13 - At Sea: Sailing the Coast of Greenland

You'll have plenty of opportunities during your at-sea days to enjoy the amenities of Ocean Explorer. Guests can relax in Tundra Spa, the gym, the sauna with large windows, and two outdoor Jacuzzis, or deepen your polar knowledge in the light-filled Discovery Library. Almost all suites have verandas, ideal for watching the passing Arctic landscape. Spending time outside on deck as we transit south along the east coast offers an opportunity to spot icebergs and, as always, we keep our eyes peeled for whales. Remember to check the lineup of polar presentations featuring our learned Expedition Team and guest eclipse expert.

Day 14 - Aappilattoq and Prins Christian Sund

Tiny and picturesque Aappilattoq, home to approximately 100 permanent residents, is perched on the shores of one of the world's most scenic fjords, the 100-km long Prins Christian Sund (also known as Ikerasassuaq). Aappilattoq is the second-most southerly settlement in Greenland (after Narsamiit). The name Aappilattoq has been interpreted to mean "sea anemone," or "red" after the crimson mountain rising above the settlement. The area has been inhabited since the 1800s, but the current village was only established in 1922. The majority of residents rely on hunting and fishing, with local fishermen selling surplus cod and turbot to a small fish factory run by Royal Greenland. Services include a general store, fire station, elementary school, boat service, church and a general repairs workshop.

Day 15 - Ivittuut: Norse History and Muskoxen

Ivittuut, formerly known as Ivigtut ("grassy place"), is an abandoned mining town near Cape Desolation in southwestern Greenland, close to the ruins of the ancient Norse Middle Settlement. Historians and archeologists believe this

settlement-- the least documented Norse settlement in Greenland--once comprised about 20 farms. A handful of mining-related structures still remain--some dilapidated--including a barracks, a storehouse and a cemetery. The 1987 translocation of muskoxen to Ivittuut from the Kangerlussuaq area is the reason you may see the lumbering beasts in the area. Otherwise, native wildlife consists mostly of Arctic hare and Arctic fox. It's also possible to spot semi-domestic reindeer from Greenland's only active reindeer husbandry operation, the Isortoq Reindeer Station, located south of Ivittuut.

Day 16 - Disembarkation in Nuuk, Charter Flight to Reykjavik

Upon arriving in Greenland's capital, enjoy one more Zodiac ride to shore for the group transfer to the airport to catch your charter flight to Reykjavik, Iceland. Upon arrival in Reykjavik, we will transfer you to your hotel. Both your hotel and charter flight are included in the Charter Flight & Hotel Package.

Day 17 - Depart Reykjavik, Iceland

After a restful night at your hotel, make your way to Keflavik International Airport for your onward flight, or spend additional time exploring Reykjavik at your leisure.

YOUR SHIP: OCEAN EXPLORER

YOUR SHIP:	Ocean Explorer
VESSEL TYPE:	Polar Expedition
LENGTH:	342 ft (104.4 m)
PASSENGER CAPACITY:	138
BUILT/REFURBISHED:	2021

Ocean Explorer, the newest addition to our fleet, is modern, elegant and purpose-built for polar exploration. The 138-passenger vessel has been designed with the latest in expedition ship technology. One of the ship's key features is the ULSTEIN X-BOW®, a marine engineering innovation that ensures a comfortable and smooth sailing experience thanks to the inverted bow. Located at the bow is the two-story, light-filled library, which introduces a welcome airiness to the expedition ship.

Spacious cabins feature a modern, bespoke Scandinavian design and almost all have verandas. Guests can relax and find comfort in the spacious gym, sauna with large windows, and two outdoor Jacuzzis.

Ocean Explorer features ample outdoor viewing areas and multi-height outer decks, which are ideal for long-view photography and wildlife viewing. The vessel is equipped with a fleet of 15 Zodiacs that enable guests to get off the ship quickly and safely for off-ship adventures. In addition to the well-appointed and spacious public areas, Ocean Explorer has an industry-leading mix of sustainability systems, including fuel-efficient Rolls Royce engines.

Two Story Library

Light-filled interior library--at the bow of the ship-- allows guests to sit and relax indoors while taking in the surrounding polar landscapes from their choice of two levels.

Leading Edge Sustainability

With the latest sustainability technology in polar expedition, the ship features fuel-efficient Rolls-Royce engines and the ground-breaking MAGS gasification system that converts waste into energy, eliminating the environmental impact of waste transportation.

ULSTEIN X-Bow

In addition to forming the double-story library, the innovative X-Bow design ensures calm, energy-efficient sailing in rough waters.

High Observation Outdoor Decks

Observation areas on Decks 7 and 8 allow for higher, longer-view landscape photography while contending with less sea spray.

Quiet and Comfortable

Spacious and luxurious cabins ensure your quiet ambience with no sound disturbance from adjoining cabins--and almost all cabins feature a balcony for outdoor viewing.

Stunning Interior Design

Each interior element was carefully hand-picked by designers for you to enjoy, from the dramatic two-story forward lounge, the floor-to-ceiling glass refuge in the library, to the grand fixtures and luxe furnishings throughout the ship.

Contemporary meets cozy in this modern dining room with its stylish lighting and contemporary art. Located on Deck 5, the Main Dining Room seats 144 guests, and features expansive floor-to-ceiling windows that open onto the spectacular polar wilderness.

Private Dining Room

Tasteful and intimate. This stylish, private dining room on deck 5 provides a relaxed dining experience--with views of the polar landscape--for up to 36 guests.

The Latitude Bar

A popular social hub on Deck 5, the beautifully-lit Latitude Bar--with its lush sofas and faux marble-topped end tables--is large enough to seat 46 and is ideal for enjoying a quiet drink on your own or hanging out with friends.

Library

Located on Deck 6 at the top of the gorgeous atrium staircase, this beautiful Library with floor-to-ceiling glass, accommodates up to 47 people

Dry Sauna

After a day of exciting off-ship adventure, guests can relax on the sauna's traditional wood benches while gazing at the polar wilderness just outside the large sauna windows. Accommodates 15 people on Deck 7.

Fitness Center

Stay fit with the latest work-out equipment in the Fitness Center on Deck 7.

Jacuzzis

Two outdoor Jacuzzis on deck 7, at the ship's stern, mean you can relax alfresco while soaking up the breath-taking polar views.

Observation Lounge

This stylish lounge at the top of the ship guarantees incredible views. Guests also frequent this spacious lookout on Deck 8 to enjoy cocktails and conversation with fellow travelers. Seats 63.
