NATURALIST GALAPAGOS 5 DAY CALIPSO CRUISE

Small ship cruising in the Galapagos Islands offers a unique and immersive experience for travelers. Unlike larger cruise ships, small ships typically carry fewer passengers, providing a more intimate and personalized experience. This allows passengers to fully immerse themselves in the natural beauty of the islands, with the opportunity to explore remote locations and encounter wildlife up close. Additionally, smaller ships can access areas that larger vessels cannot, providing a more comprehensive and in-depth exploration of the Galapagos. Small ship cruising also provides a more sustainable and eco-friendly way to explore the Galapagos. The islands are a delicate ecosystem, and larger ships can have a negative impact on the environment. By choosing a small ship, travelers can enjoy the beauty of the islands without leaving a significant footprint.

ITINERARY

Day 1: Thursday SAN CRISTOBAL ISLAND

Arrival in San Cristobal Airport and Transfer to the boat Witch Hill Located on the northern coast, this eroded hill and its surroundings present one of the most picturesque beaches in the Galapagos with its white powdery sand and the abundance of animals. Wildlife includes sea turtles, rays, and various types of booby birds. The clear water provides an excellent opportunity for enjoying swimming and snorkeling.

Day 2: Friday BARTHOLOMEW AND SANTIAGO ISLANDS

Bartholomew Island Home of the famous Pinnacle Rock, Bartholomew consists of an extinct volcano with a variety of red, orange, black and even green volcanic formations. A trail of stairs leads to the summit of the volcano,

boasting one of the best views of the islands. The beach is perfect for snorkeling and possible sightings of the Galapagos penguin. Chinese Hat Islet This small islet is located near the southeast coast of Santiago Island. Its name comes from the distinct shape of the islet's summit. This small islet is a great location to view many geological formations such as lava tubes and lava flows.

Please Note:

Itineraries are subject to change.

Day 3: Saturday FERNANDINA AND ISABELA ISLANDS

Espinoza Point No foreign species have ever invaded Fernandina Island, and therefore it is one of the world's most pristine island ecosystems. The volcano "La Cumbre" dominates the landscape with lava fields reaching the ocean. The island's highlight features the flightless cormorant nesting site. This area provides a great opportunity to see the Galapagos hawk. Tagus Cove Tagus Cove is located across from Fernandina Island near the Bolivar Channel dividing the two islands. This spot has been frequented by ships since the 1800s using the area as an anchorage site. Trails winding by Lake Darwin up to a ridge display wonderful views. Punta Tortuga, just north of Tagus Cove, is another lovely beach surrounded by mangroves.

Day 4: Sunday ISABELA ISLAND

Urbina Bay Urbina Bay is located at the base of Alcedo Volcano on the west coast between Tagus Cove and Elizabeth Bay. This area experienced a major uplift in 1954 causing the land to rise over 16 feet. The coast expanded half a mile out leaving marine life stranded on the new shore. This area is also a great place for snorkeling. Moreno Point Moreno Point is located near Elizabeth Bay on the west coast of Isabela Island. The plethora of birds seen during a dinghy ride along the striking rocky shores or a hike along path through lava rock leading to tide pools and mangroves create a birdwatcher's delight. In the tide pools, green sea turtles or white-tip sharks can be spotted.

Day 5: Monday NORTH SEYMOUR ISLAND

North Seymour Island Galapagos sea lions, blue-footed boobies and magnificent frigatebirds are abundant on North Seymour Island. The island was formed by a series of submarine lava containing layers of sediment that were uplifted by tectonic activity. The island is characterized by its arid vegetation zone. Transfer to the Baltra Airport
