## NORTH SPITSBERGEN - ARCTIC SUMMER

The North Spitsbergen cruise sails to some of the remotest locations of northern Europe. The expedition gives you the opportunity to spot historic whaling remains, glaciers, a variety of Arctic birds including the Little Auk, and polar bears.

Foxes, seabirds, and grazing reindeer

From Trygghamna you walk to Alkhornet, a large seabird cliff where the birds are scouting out breeding places. Below the cliffs is a common place to spot Arctic foxes, and you may also see reindeer grazing on the lush vegetation if there's not too much snow.

Remains of the whalers

You sail into Fuglefjorden amid views of Svitjodbreen and Birgerbukta, both breeding areas for great skuas as well as likely spots to see a polar bear. The aim is to visit Ytre Norskøya, a small island that served for many years as a Dutch whaling lookout. Here you can still follow the whalers' tracks to the summit of the island, passing popular bird cliffs on the way. On shore are the remains of more 17th-century blubber ovens, while Arctic skuas and common eiders breed among the graves of some two hundred Dutch whalers.

Glaciers and Raudfjord geology

Raudfjorden, on the north coast of Spitsbergen, is a fine place for gazing over the glaciers. It's also a favorite hangout for ringed

and bearded seals, colonies of seabird, and the occasional polar bear and beluga whale. Alicehamna and Buchananhalvøya are fine places for gazing over the geology of the land.

Wide open tundra

If ice conditions permit, you may land on the northern side of Graahuken, an extensive tundra area of Spitsbergen, and walk from there to Hyttesletten. The plain is a popular grazing area for reindeer, and several species of waders also breed here. Similarly, the lakes afford you a good chance of spotting red-throated divers and king eiders.

Monaco Glacier

Depending on the weather and sea ice, we could sail into Liefdefjorden, land at Texas Bar and cruise within sight of the 5-kilometer-long (3.1 miles) face of Monaco Glacier. The waters in front of this precipitous glacier are a favorite feeding spot for thousands of kittiwakes, and the base of the ice is a popular polar bear hunting ground. If ice conditions prevent us from sailing here early in the season, we may sail along the west coast of Spitsbergen.

On to the little auks

You then sail south to Magdalenafjorden, one of the glacier-filled highlights of Spitsbergen. A shore visit at Gravnaset

Wild Earth Travel

info@wildearth-travel.com | **wildearth-travel.com**

shows you the remains of 17th-century English whaling, and you can also see large colonies of little auks.

Earth 's northernmost community

You head north for Kongsfjorden and Krossfjorden. We aim to visit places of historic interest: Ny London, where you can see the remains of early 20th-century marble mining, and Ny Ålesund, the northernmost community in the world. There are also research stations and the famous anchor mast of the dirigible Norge, which took the first flight across the North Pole to Nome, Alaska in 1926. Krossfjorden offers views of colossal glaciers and lofty mountain peaks.

Walrus ashore

On your journey south, the goal is a landing in Forlandsundet at Sarstangen, a walrus haul out. Alternatively you could land on the coast of Engelsbukta. The tundra here is a fine place for a walk to Hornbaekbukta. Also at Poolepynten is a walrus haul out.

Wide tundra, towering mountains

The next stop is Bohemanflya, an expansive tundra with its own avifauna (depending on when spring arrives) and spectacular geological formations along the coast. In Gipsvika you can go on shore near Templet, a mountainous location of eroded sedimentary rock from the Upper Carboniferous period - around 290 million years ago.

years ago.

## ITINERARY

### Day 1: Largest town, biggest island

You touch down in Longyearbyen, the administrative center of Spitsbergen, the largest island of the Svalbard archipelago. Enjoy strolling around this former mining town, whose parish church and Svalbard Museum make for fascinating attractions. Though the countryside appears stark, more than a hundred species of plant have been recorded in it. In the early evening the ship sails out of Isfjorden, where you might spot the first minke whale of your voyage. In the evening you sail for Trygghamna, where you see the remains of a 17th-century English whaling station and 18th-century Pomor hunting station, both of which you can visit the next morning.

### Day 2: Foxes, seabirds, and grazing reindeer

From Trygghamna you walk to Alkhornet, a large seabird cliff where the birds are scouting out breeding places. Below the cliffs is a common place to spot Arctic foxes, and you may also see reindeer grazing on the lush vegetation if there's not too much snow.

**info@wildearth-travel.com**

## Day 3: Remains of the whalers

You sail into Fuglefjorden amid views of Svitjodbreen and Birgerbukta, both breeding areas for great skuas as well as likely spots to see a polar bear. On Birgerbukta you can see 17th-century Basque ovens once used for cooking whale blubber. The aim next is to visit Ytre Norskøya, a small island that served for many years as a Dutch whaling lookout. Here you can still follow the whalers' tracks to the summit of the island, passing popular bird cliffs on the way. On shore are the remains of more 17th-century blubber ovens, while Arctic skuas and common eiders breed among the graves of some two hundred Dutch whalers.

## Day 4: Glaciers and Ermaktangen geology

Raudfjorden, on the north coast of Spitsbergen, is a fine place for gazing over the glaciers. It's also a favorite hangout for ringed and bearded seals, colonies of seabird, and the occasional polar bear and beluga whale. Ermaktangen, at the fjord coast of Spitsbergen, is a fine place for gazing over the glof of the land.

## Day 5: Wide open tundra

If ice conditions permit, you may land on the northern side of Reindyrflya, the largest tundra area of Spitsbergen. This vast and rolling plain is a popular grazing area for reindeer, and several species of waders also breed here. Similarly, the lakes afford you a good chance of spotting red-throated divers and king eiders.

## Day 6: The massive Monaco Glacier

Depending on the weather, you could sail into Liefdefjorden and cruise within sight of the 5-kilometer-long (3.1 miles) face of the precipitous Monaco Glacier. The waters in front of this glacier are a favorite feeding spot for thousands of kittiwakes, and the base of the ice is a popular polar bear hunting ground. If ice conditions prevent sailing here early in the season, an alternate route along the west coast of Spitsbergen can be implemented.

## Day 7: On to the little auks

In the morning you land at Fuglesangen, where you can observe spirited communities of little auks. You then sail south to Magdalenafjorden, one of the glacier-filled highlights of Spitsbergen. A shore visit shows you the remains of 17th-century English whaling, and you can also see more large colonies of little auks.

## Day 8: Earth's northernmost community

You head north for Kongsfjorden and Krossfjorden. The landscape is likely to show signs of winter, the crags and slopes still blanketed with snow. We aim to visit places of historic interest: Ny London, where you can see the remains of early 20th-century marble mining, and Ny Ålesund, the northernmost community in the world. There are also research stations and the famous anchor mast of the dirigible Norge, which took the first flight across the North Pole to Nome, Alaska in 1926. Krossfjorden offers views of colossal glaciers and lofty mountain peaks, but ultimately the extent of fjord ice dictates the itinerary here.

## Day 9: The past days of polar bear hunting

On your journey south, the goal is a landing at Fuglehuken. Here you see remains from the great era of polar bear hunting. There are also large seabird colonies and a haul-out spot for harbour seals. Alternatively you could land on the coast of Forlandsundet, at Engelsbukta or Sarstangen. Walrus are occasionally seen here, and the tundra is a fine place for a walk.

## Day 10: Wide tundra, towering mountains

The next stop is Bohemanflya, an expansive tundra with its own avifauna (depending on when spring arrives) and spectacular geological formations along the coast. In Gipsvika you can go on shore near Templet, a mountainous location of eroded sedimentary rock from the Upper Carboniferous period - around 290 million years ago.

## Day 11: There and back again

Every adventure, no matter how grand, must eventually come to an end. You disembark in Longyearbyen, taking home memories that will accompany you wherever your next adventure lies.

#### Please Note:

All itineraries are for guidance only. Programs may vary depending on local ice and weather conditions and in order to take advantage of opportunities to see wildlife. The on-board expedition leader determines the final itinerary. Itineraries may mention places that require permission to land, which must be granted by the relevant national authorities. Such permission is not granted prior to the publishing of these itineraries. Flexibility is paramount for expedition cruises. Willingness to compromise on comfort is a basic requirement on board of a historic traditional sailing vessel. Important information about the sailing program: the boat is equipped with sails and these will be used in good conditions (open sea, water depth, appropriate wind conditions, time availability). This is not guaranteed. The captain decides whether to use the sails or the engine. There is no claim to one or other propulsion method. If sails are used, they are operated by the crew. Guests follow the safety instructions of the team. Average cruising speed for s/v Rembrandt van Rijn is 6.5 knots.

## YOUR SHIP: REMBRANDT VAN RIJN

<b>YOUR SHIP:</b>	<b>Rembrandt van Rijn</b>
<b>VESSEL TYPE:</b>	<b>Expedition Yacht</b>
<b>LENGTH:</b>	<b>49.5 metres</b>
<b>PASSENGER CAPACITY:</b>	<b>33</b>
<b>BUILT/REFURBISHED:</b>	<b>1900's / 1994 / 2011</b>

S/V Rembrandt Van Rijn was originally built as a herring lugger in 1947. The vessel was then rebuilt as a three-mast passenger sailing schooner in the Netherlands in 1994, sailing in Spitsbergen (1994 - 1996) and the Galapagos (1998 - 2001). The vessel later underwent a complete rebuilding and refurbishment program until 2011. The communication and navigation equipment has been completely renewed according to the latest SOLAS regulations.

Perfect for expedition cruising among small islands the ship is well suited for expedition cruising among small islands and offer good open deck viewing areas, also when under sail. The two inflatable rubber crafts (Zodiacs) enable landing and wildlife viewing opportunities in otherwise inaccessible areas.

### Comfort and Character

Rembrandt van Rijn measures 49,50 meters in length, 7 meters in width, and has a draft of 2,8 meters. The average cruising speed on engines is 6,5 knots. It has an experienced crew of 12 persons on board including 2 tour guides. The ship can accommodate a maximum of 33 passengers in 16 cabins. It has one Triple Private cabin (with shower and toilet and

porthole), six Twin Private Inside cabins (with shower and toilet, no porthole), and nine Twin Private cabins (with shower and toilet and porthole).

### Age range & Nationality onboard

Passengers on a typical voyage range from their 30s to their 80s - with a majority usually from 45 - 65, but a little younger on the Rembrandt van Rijn, between 30 - 55. Our expeditions attract independent-minded travellers from around the world. They are characterised by a strong interest in exploring remote regions. The camaraderie and spirit that develops aboard is an important part of the expedition experience. Many departures have several nationalities on board.

### Catering

Three simple but good meals of international cuisine per day are served buffet style in the restaurant and is prepared by our cook.

### Dress code

In keeping with our expeditions atmosphere, dress on board is informal. Bring casual and comfortable clothing for all activities. Keep in mind that much of the spectacular scenery can be appreciated from deck, which can be slippery. Bring sturdy shoes with no-slip soles and make sure the parka is never far away in case of the call "Whales!" comes over the loudspeaker and you have to dash outside. Wear layers since it is comfortably warm aboard the ship - and often cold on deck.

### Electric Current

The electrical supply aboard the ship is 220 volt 50hz. Electrical outlets are standard European with two thick round pins. U.S. passengers may need a 220v/110v converter.

**wildearth-travel.com**

**info@wildearth-travel.com**

## Excursions & Landings

Every day there will be excursions on land, weather and ice permitting. The landings will take three to six hours per day over untracked area. According to circumstances (the weather, the ice-situation or the passengers' wishes) the program can sometimes be adjusted. Ample time will be devoted to wildlife, vegetation, geography and history.

## Gratuities

The customary gratuity to the ship's crew and expedition leader is made as a blanket contribution at the end of the voyage. Tipping is a very personal matter and the amount you wish to give is at your discretion. We suggest to give cash in Euros, US Dollars or Danish kroner.

## Non-smoking policy

On board our vessels we have a non-smoking policy. It is prohibited to smoke inside the ship. You can smoke in designated areas. Please respect the wishes of non-smokers.

## The crew

The crew of the 'Rembrandt van Rijn' consists of 9 experienced crew and 2 expedition guides and a cook. The sailors are in charge during sailing and will bring us ashore.

## Your physical condition

You must be in good general health and you should be able to walk several hours per day. The expedition is ship-based and physically not very demanding. Although we spend as much time as possible ashore, you are welcome to remain aboard the ship if you like. To join most excursions, you must be able to get up and down the ladder from the ship to the water level to board the Zodiacs. Staff will assist you in and out of the boats. This will become progressively easier with practice. Ashore it can be slippery and rocky. You are travelling in remote areas without

access to sophisticated medical facilities, so you must not join this expedition if you have a life-threatening condition, or need daily medical treatment.

treatment.
