NORTHERN LIGHTS EXPLORER EXPEDITION CRUISE

Shorter days in the high latitudes means darkening evening skies, so on this voyage we stay close to the coastlines of the Arctic Circle, skirting around the Norwegian and Greenland seas, and exploring remote islands and villages of the region. As night falls, we look skywards hoping to catch the magic of the northern lights. This spectacular natural phenomenon offers a surreal light display as vibrant hues of blue, green, pink and violet dance across the night sky. Places located near the Arctic Circle such as northern Norway, Iceland and Greenland, are some of the best places in the world to witness this stunning light show.

Day 5 Leknes & Reine, Norwegian Coast

As you traverse the scenic vistas of Lofoten, marvel at majestic mountain peaks and expansive fertile lands that once set the stage for Viking sagas. Your expedition begins in Haukland Beach, a paradisiacal haven with its pearly white sands and sapphire waters, embraced by lush greenery and towering peaks, evoking the essence of an Arctic paradise. We will have ample time to hike from Uttakleiv, to Haukland Beach—a gentle stretch over hills and along the coastal path to the pristine white sand beach.

Upon reaching the Viking Museum in Borg, enjoy an exhibition showcasing archaeological discoveries and meticulous recreations of Viking dwellings, gaining a vivid understanding of the daily lives of these seafaring people a millennium ago. The museum endeavours to authentically recreate the Viking village atmosphere, complete with handicrafts, traditional buildings, and era-specific cuisine. Continue to the village of Reine where your ship will be waiting for you. This fishing village is one of the most beautiful in Norway, and we are sure that when you see it you will understand why!

Day 6-7 At Sea

Enjoy the crossing to Jan Mayen, accompanied by seabirds as we search for whales. Enjoy informative talks from our team of experts, get to know your fellow expeditioners or stay active in the gym. Remember to look to the skies at night and hope for sightings of the northern lights.

Day 8 Jan Mayen

The approach to Jan Mayen is spectacular. The huge 2,277-metre (7,470 foot) Beerenberg volcano is the northernmost active volcano in the world, and it last erupted in 1985. The northern part of the island is a great place to look for whales and dolphins and contains impressive glaciers, some of which reach the sea. If the weather is favourable, we will try to land at Kvalrossbukta, a relatively sheltered bay on the island's west coast. This is one of the landings used to supply the weather station Olonkinbyen, situated on the eastern side of the island.

Day 9-14 East Greenland

In the coming days, a host of choices are available to us, and depending on ice and weather conditions, the east coast of Greenland is ours to explore. The members of our experienced Expedition Team, who have made countless journeys to this area, will use their expertise to tailor our voyage to suit the day-to-day conditions. This allows us to make best use of the prevailing weather, ice conditions and any opportunities for wildlife encounters. We generally attempt up to two landings or Zodiac excursions per day, including cruising along spectacular ice cliffs, following whales feeding near the surface.

Be prepared to experience ice - and lots of it! East Greenland contains some of the Arctic's most impressive scenery. Deep fjords and narrow channels, flanked by sharp ice-clad peaks soaring up to 2,000 metres (6,562 feet), and glaciers birthing gigantic icebergs that drift throughout the fjord system,

combine to create breathtaking scenes.

The tundra landscape is home to musk oxen, arctic hares and reindeer. Throughout the area there are ancient Thule archaeological sites, historical trappers' huts, and the cabins of present-day Inuit hunters. A highlight is a visit to the Inuit village of Ittoqqortoormiit, the most isolated and northernmost permanent settlement in the region, with approximately 450 inhabitants. The community has an excellent museum, gift shop, an abundance of Greenlandic sled dogs and provides the opportunity to meet the friendly locals.

Explore Scoresbysund, the world's largest fjord system and a favourite hunting ground of the local Inuit. Massive glaciers flow into this fjord, the birthplace of hundreds of majestic Greenland icebergs. It is a spectacular place that simply needs to be seen to be believed. North of Scoresbysund lie Kong Oskar and Kaiser Franz Josef fjords, two of the most significant fjord systems in Greenland, each one encompassing several smaller fjords and sounds. Thanks to the fertile volcanic soil and the surrounding mountains offering protection from strong winds, the area is rich in wildlife. You may spot everything from musk oxen and arctic foxes to mountain hares, and even reindeer, near the fjord. Look skyward and you could catch a glimpse of birds, including the glaucous gull, black-legged kittiwake, northern fulmar, common raven and common eider.

We will attempt to enter Kaiser Franz Josef Fjord, a remote and rarely visited fjord system with countless opportunities for exploration, located within the Northeast Greenland National Park. Cruising through Kong Oskar Fjord, we marvel at the geological beauty of the mountains. We will then head south along the coast of Liverpool Land, with our passage dependent on ice conditions.

We stretch our legs on hikes across tundra in search of ancient graveyards and summer villages occupied 3,000 years ago by Inuit. We may see musk oxen, arctic hares and reindeer grazing. The maze of calm, interconnecting waterways in this area provides excellent opportunities for sea kayaking. We will see ring seals, perhaps catch a glimpse of the elusive narwhal, and maybe even a polar bear hunting on pack ice.

Day 15 Ísafjörður & Vigur Island, Westfjords

Over the coming days, we explore the Westfjords region, which features outstanding landscapes with jaw-dropping views of dramatic fjords carved by ancient glaciers, sheer, table-top mountains that plunge into the sea, and pristine north Atlantic vegetation. The region features attractive towns such as

Ísafjörður, surrounded by sheer mountains and steeped in history, evident in its preserved wooden architecture. Delight in its lively cultural scene and abundant outdoor activities.

On Vigur Island, birdwatchers can try and tick a few species on their list, while others can enjoy walks and hikes of varying levels of difficulty, soaking in the stunning surrounds. The island's unique ecosystem is a haven for birdlife, making it a paradise for nature enthusiasts. Stroll along the coastline, keeping an eye out for puffins and other seabirds, or venture deeper into the island to discover hidden gems. With its rolling hills, picturesque landscapes, and fresh sea air, Vigur offers an unforgettable experience.

Day 16 Thingeyri, Westfjords

Thingeyri, a quaint village nestled on a slender strip of land, graces the shores of one of Iceland's most picturesque fjords, Dýrafjörður. Much like many other coastal settlements in Iceland, the village's culture and industry have been intricately woven with the influence of the sea over centuries. The surrounding landscape is adorned with towering mountains, lending a distinctive charm to the scenic expanse that envelops Thingeyri. This idyllic region is often hailed as the "Alps of the Westfjords," especially the highland area nestled between the majestic fjords of Dýrafjörður and Arnarfjörður. The beauty of Thingeyri lies not only in its coastal simplicity but also in the dramatic backdrop of high mountains that paints a captivating portrait of this Icelandic village.

For avid explorers, Iceland is littered with hidden gems, and possibly the best-kept secret of all is the Westfjords. Lying in the most north-westerly area of the island, this sprawling area of natural beauty is truly a hiker's paradise. Rocky peaks, deep crevices, and charming Icelandic towns all add to the appeal of the Westfjords, not to mention the various hiking trails snaking across the unusual countryside. Today we will hike Sandafell, offering gorgeous views over the town, surrounding mountains and the water below.

Immerse yourself in the tranquillity of the afternoon as we cruise southward, taking in breathtaking landscapes and keeping a watchful eye for whales. Later, we'll embark on a Zodiac landing to witness the awe-inspiring power of Dýnjandi waterfall.

Day 17 Snaefellsnes Peninsula

Grundarfjörður is the starting point of our adventures on the Snaefellsnes Peninsula, gateway to Snaefellsjökull National Park. Snaefellsnes Peninsula is an area of diverse landscapes that is characterised by lava fields and glistening fjords and home to a vast array of birdlife. The area is crowned by the magnificent, ice-capped Snaefellsjökull volcano, a 700,000-year-old dormant subglacial volcano, visible from Reykjavík on a clear day and immortalised in Jules Verne's Journey to the Centre of the Earth.

Duration: 8 hours including lunch

Level of difficulty: Moderate

Upon disembarkation, we will stop will be the iconic Mount Kirkjufell, a favourite among photographers and known to many as a filming location for the TV show "Game of Thrones". Not far from this majestic mountain is a waterfall that completes the picturesque scene. Next, you'll step into the 8,000-year-old Vatnshellir Cave, replete with stunning geology, fascinating rock formations, and colourful volcanic rock. We will meet at our base near the cave, where your friendly guide will provide you with all the equipment that you need, including a helmet and headlamp (we strongly recommend that you wear comfortable and sturdy footwear, as the volcanic rock can be quite difficult to traverse). Then your friendly guide will give you a brief safety talk before we descend the spiral staircase into this subterranean wonderland. The tour meanders through the path of the lava flow around 200 meters into a large cave that lies around 35 meters beneath the surface of the earth, where we will be greeted by some rainbow-coloured volcanic rocks and incredible petrified lava formations. The cave is a fairly easy walk, although it will involve a degree of climbing. The Land of Fire and Ice is well-known for its incredible landscapes and contrasting terrains that include several natural and geological wonders rarely found anywhere else on Earth. The unique geological history of Snaefellsnes will draw you in where you can explore sites revealing Iceland's unique geological history up close. Your first stop is at Eldborg crater, located on a short volcanic rift, just 200 metres in diameter, and 50 metres deep. It is the largest crater on this rift and was created in an eruption which occurred somewhere between 5000 and 6000 years ago. Unlike many of Iceland's volcanoes, it has a very classic shape, with smooth sloping sides and a very definite crater. A marked hiking path leads through a shrub-covered lava field to the top of the crater offering incredible views of Snaefellsnes National Park. We continue to the symmetrical, hexagonal-shaped basalt columns at Gerðuberg Cliffs. Stand in awe at these impressive cliffs, a natural marvel that spans 500 metres. To enjoy the best view, take a walk by the structures. Climbing up the cliff is possible but to really soak in the views of this geological structure, it's best to enjoy a walk alongside the cliffs. Following an early lunch, re-join the coach and head for the Pufubjarg bird cliff, home of nesting puffins and fulmars. From here, hike along the rugged coastline to witness the exceptionally beautiful Londrangar basalt cliffs, a geologic wonder that looks like a huge rock castle. There are many local birds here, and they are a noisy bunch. Puffins, but especially fulmars, nest in the many cavities in the two pillars. From here you hike across a pretty lava field covered in moss to Malarif, where you can see the lighthouse and explore the beach.

Day 18 Disembark in Reykjavik

During the early morning, we cruise into Reykjavik and disembark at approximately 8.00 am. Farewell your Expedition Team and fellow passengers as we all continue our onward journeys. Transfer to Keflavik airport.

Note: At the conclusion of the voyage, we recommend booking flights departing after 12.00 pm on the day of disembarkation in case there are delays.
