

SVALBARD AUTUMN LIGHT WITH CHRISTIAN NØRGAARD

Are you passionate about capturing the beauty of the wild, eager to elevate your photography skills amidst Earth's most awe-inspiring landscapes? Seize this chance to journey alongside renowned photographer Christian Nørgaard, who will be your Special Lecturer and mentor throughout this Svalbard expedition. The diverse landscapes, shimmering glaciers, and majestic wildlife - from the massive walrus and swift Arctic fox to the mighty polar bear - transform Svalbard into a photographer's paradise.

As the tundra shifts to warm autumn colours and the sun begins to set once again, we are treated to stunning sunsets and soft light, ideal for photography.

In the middle of September, we set out into the untamed wilderness of Svalbard. With 10 nights on board, you'll have countless extraordinary photo opportunities. Zodiac excursions in the soft autumn light bring you up close to Svalbard's incredible landscapes, while onshore hikes invite you to capture its essence from every angle.

The Arctic foxes have begun changing into their beautiful white winter coats, and the Svalbard reindeer are photogenic with their full-grown antlers.

The ice has receded, allowing for exploration further east. We also have excellent opportunities to reach Bråsvellbreen, a magnificent glacier front stretching 45 kilometers. By this time of year, the first snow may have fallen, beautifully dusting the

mountain peaks and the landscapes.

landscapes.

ITINERARY

Day 1: Longyearbyen, Svalbard

Arrive in Longyearbyen and transfer to your hotel, where we will spend the night before embarking on our great adventure.

Day 2 - 11: Expedition cruising

Explore Longyearbyen on your own before meeting your fellow travelers and guides for lunch. In the afternoon, we embark on the expedition ship and sail through the spectacular Isfjorden--our Arctic adventure has begun! We are now in a part of the world where we are entirely dependent on the ice and weather

conditions. Our exact itinerary will be shaped by these factors and by the wildlife we encounter. Our goal is to go on Zodiac cruises every day and go ashore whenever possible. Here are some examples of places we may visit:

Northwest Spitsbergen

With its high, pointed mountain peaks (hence the name), Northwestern Spitsbergen offers stunning vistas and exceptional opportunities for landscape photography. Whether capturing the dramatic play of light on the mountains or the serene reflections in the fjords, the region is a paradise for photographers.

The scientific village of Ny-Ålesund is situated in Kongsfjorden. It was from here that Amundsen and Nobile launched their heroic expeditions to the North Pole. Two other daring attempts to reach the North Pole also began on the island of Danskøya. The Swedish explorer Andree attempted it with a hydrogen balloon, while the American journalist Wellman used an airship. Fascinating remnants of these expeditions can still be seen today.

The magnificent fjords of Svalbard

Svalbard offers countless spectacular fjords, home to an abundance of wildlife. Below are some fjords and glaciers we may explore by ship or Zodiac during our journey:

In **Krossfjorden**, we find one of the largest glaciers in northwestern Spitsbergen, Lilliehøkbreen, which stretches around 22 km. The beautifully sculpted front of this incredible glacier is best enjoyed during a Zodiac cruise.

Liefdefjorden, meaning "The fjord of love," is lined with snow-covered mountain peaks, and here we hope to cruise along the face of the stunning Monaco Glacier, which is a popular spot for bearded seals.

Raudfjorden is an area of immense natural beauty, dominated by striking glaciers.

North of Spitsbergen

Depending on the weather and ice conditions, we hope to reach the pack ice north of Spitsbergen. This floating, ever-changing habitat offers a fascinating and powerful experience. Few ships venture here, allowing us to enjoy the

tranquillity of this magnificent icy landscape. We remain on the lookout for exciting Arctic wildlife, including polar bears and seals. The pack ice around Svalbard plays a crucial role in the archipelago's ecosystem and climate, serving as a vital component of life in the Arctic.

Eastern Svalbard

The island of Nordaustlandet is covered by a huge ice cap and has fascinated naturalists and historians alike. Here the giant glacier Bråsvellbreen stretches for 180 kilometres! The 15-20 metre high ice edge is punctuated by hundreds of by hundreds of waterfalls. Barentsøya and Edgeøya offer magnificent scenery and vast tundra. There is a good chance of seeing walrus, arctic fox and Svalbard reindeer.

Isfjorden

At the entrance of Isfjorden stands the scenic cliff of Alkhornet, inviting refreshing hikes across the tundra. Here, we hope to encounter Svalbard reindeer grazing in their natural habitat. Arctic foxes are sometimes seen in the rock crevices around the mountain and with a bit of luck we might see these lovely little animals scurrying around, frantically looking for food.

Day 12: Longyearbyen

In the early morning, we disembark from our expedition ship and begin our journey home.

All itineraries are for guidance only

Our exact route will depend on ice, weather conditions, wildlife and government regulations. The places mentioned are just examples of some of the many sites Svalbard has to offer. We always strive to maximise your experience. Please remember that flexibility is the key to a successful expedition!

YOUR SHIP: SJOVEIEN

YOUR SHIP:	Sjoveien
VESSEL TYPE:	Small Ship
LENGTH:	40.66 meters
PASSENGER CAPACITY:	12
BUILT/REFURBISHED:	

Built/Refurbished : 1964/2017

M/S Sjøveien (meaning the Seaway) was built in Bergen in 1964 for the Norwegian Government and she worked for them in various capacities. From 1979 until 1995 she was used as a training ship for mariners. Since 1995 she has been in private ownership and during the many years since, worked for the Norwegian coast guard. After being a hotel ship for the past few years, she is now being refurbished into a classic and exclusive passenger ship and will set sail towards Svalbard in the early summer of 2017.

She is a true beauty with wooden decks and vintage details. There is a lot of deck space on the main deck and there is also an excellent area on top of the bridge, from where you have wonderful views of the magical Svalbard scenery.

To accommodate a maximum of 12 passengers there are eight outside cabins, all with private facilities. On the lower deck there are four twin cabins with portholes. On the main deck there are two larger twin cabins with windows and one large superior cabin with a double bed and windows. The eighth cabin is located on the upper deck and is a large superior cabin with windows. The dining area on the main deck is where you are

served breakfast, lunch and dinner. Here is also a lounge area where you can relax with a cup of tea or coffee and listen to interesting talks by the guides. There is an international crew on board who speak English and the bridge is open for visitors.
